## BARROWMORE

## MODEL RAILWAY GROUP

"Modelling to a high standard amongst friends"

**Workshop Notes: Brass Sections** 

Based on an article in **Barrowmore Model Railway Journal** Number 11 (June 2007). Price information updated December 2008

A few weeks ago, Dave Faulkner was investigating potential problems which might occur in making working ground signals for "Mostyn" (the ones we have now are purely cosmetic white-metal castings). One of the possible snags he identified was getting hold of small-bore brass tubing, to act as working bearings. One of the suggestions made by group members was having a look at a firm called Finney and Smith who, as well as specialising in 3mm scale kits etc., also sell a wide range of brass bits. Iain Kirk, who came up with the website name (http://finneyandsmith.co.uk), had previously had dealings with them at work. Of course I had a look, and yes, they look a very promising source of small brass sections! I was particularly impressed by their range of brass 'L' angle which we use for footsteps/footboards on our rolling stock.
